Company Overview

5ST, Inc. ("5 Stones Technologies") is a SDVOB founded 2010, with its core experience in telecommunications and enterprise engineering & technology management. Our goal is to provide comprehensive best-in-service Subject Matter Expertise (SME) and professional services to the private sector, Federal and State entities. The collective expertise of the 5 Stone Technology core team represents 45 plus years of military and civilian service in end-to-end Program and Technology implementation and analysis. 5ST is based in Temecula, CA with satellite offices in Port Jervis, NY and Brandon, FL and Frisco, TX.

The breadth of our capabilities is augmented to accommodate the growing demands for our services through strategic partnerships with likeminded firms and consultants with track records of success in their areas of expertise and dedication to the delivery of best-in-class services.

Services

Telecom, IT & Network Engineering: Delivering an array of services from Network Engineering Planning & Design and Network Operations Center (NOC) management to Cyber Security and Field Support Engineering along with extensive experience with planning, implementing and managing Municipal Broadband (ISP and OSP end to end) as well as Installation/de-installation of Fiber Optic Cable, OTDR troubleshooting and repair of Inside (ISP) and Outside Plant (OSP) fiber optic cables and WiFi for the DoD, Local governments and commercial entities.

SATCOM: Providing Subject Matter Expertise (SME) in Strategic and Tactical Satellite Communications (SATCOM) facilities and peripheral equipment with life cycle engineering capabilities through O&M for SATCOM systems in commercial, DOD, SATCOM and Teleport facilities.

Logistics: Delivering Subject Matter Expertise (SME) and up to DAU Level III certified Logistic professionals in all phases of a product or system's Life Cycle (from cradle to grave) in the development and maintenance of advanced C4ISR systems and subsystems to include SATCOM Systems.

Data Management: Providing Subject Matter Expertise (SME) Data management support for cloud architecture, distributed data warehousing, Big Data Analytics, Artificial Intelligence and Blockchain Technology.

Project Management: Providing Subject Matter Expertise (SME) with PMP and DAU Level III certified Project Managers in quality customer support and consulting across an array of project types from IT and portfolio project management to acquisition management.
